ENHANCE YOUR **SKILLS**, EMPOWER YOUR LIFE

About **SKILLSPower**

We aim to create tailored experiences for our clients bearing the following principles in mind:

- ✧ Provide our clients with comprehensive information about our training programmes, trainers, and service rates.
- ✧ Collaborate together with our clients to determine realistic goals and expectations to create the most beneficial training session for their needs.
- ✧ Rather than hard-selling our services to you, we are more interested in getting to know our clients and work together to create the best possible solution to reach the desired goals.
- ✧ Our team of certified professional trainers are highly experienced bilingual or trilingual native speakers possessing Master's degree qualifications, with the ability to provide versatile training across many industry segments, including banking and finance, hospitality, retailing, engineering, and architectural management.
- ✧ We look forward to finding the best suitable match between trainer and participants, to better develop a unique and ideal learning experience essential to success.

博奕論

Game Theory 應用博奕理論

Better decision making skills

The objective of the problem solving workshop is to enhance the skills for solving problem and making decision. **Game theory** (博奕論) is the theory of independent and interdependent **decision making**. It is concerned with decision making in organizations where depends on the decisions of two or more autonomous players, one of which may be nature itself, and where no single decision maker has full control over the outcomes. Obviously, games like chess and bridge fall within the ambit of game theory, but so do many other social situations which are not commonly regarded as games in the everyday sense of the word.

The workshop will be delivered through lectures, discussion, activities and participation. Participants will have the opportunity to learn Game Theory and apply it in solving the problem.

Upon completion of the workshop, participants will have an understanding of how to use Game Theory to solve problems.

Program Highlights:

- **Welcome and introduction**
 - Participants consider their personal and team goals for the workshop
 - Set some ground rules to help them learn and work together
 - Ice breaking game to energize the participants for the learning of the day
- **Game Theory**

<ul style="list-style-type: none">■ What is Game Theory?■ Different types of games■ Game Theory vs Nash Equilibrium■ Case studies for Game Theory	<ul style="list-style-type: none">■ Concepts of Game theory■ Analysis of Game Theory■ Best strategy in Game Theory
--	--
- **Application of Game Theory in real life**
- **Group discussion & activities**
- **Look forward and action plan**

**Team Building –
Power Up Your Creativity and Innovation**

Team Building – Team Challenge of Detective Game

Reach an even higher level of teamwork and performance!

Activities and team experiences along with group processing and discussions can further team building, helping to bring together a mutually motivating and understanding team.

Through experience and collaborative relationships, our team building workshop empowers people and provides them with the opportunity to learn about themselves and others. Also, by utilizing experiential education, looking at actions and reactions in given situations, allows participants to mutually assess their performance as a collective unit accelerating overall development.

Program Highlights:

- **Getting started**
 - Trainer uses energizer to warm up the team & divide the all participants into different teams
- **With a twist**
 - Promoting the culture of listening, respect and appreciation in the team setting
 - Achieving alignment of team and individual vision and objective
- **Mission: Finding the lost jewelry**
 - Fostering team communication, mutual trust and better understanding in face of the workload and challenges ahead
 - Cultivation of greater sense of responsibility and leadership skills in each individual team member
- **Facilitating team learning**
 - Point out the importance to face the challenges and insecure feeling in a positive way
 - Emphasis everyone's responsibility in the team
 - Achieving a sense of belonging, identity and positivism towards the grades among team members

This participative workshop uses magic as a creative tool to sparkle out of the box thinking skills about problem solving. Co-facilitated by a working magician, participants will experience moments of astonishment with entertaining performances, then asked to solve the problems in order to achieve the effects. The effects will be explained and taught in context of creative problem solving and how to apply thinking out of the box at work in a similar way.

Program Highlights:

- **Magic performance**

Magician will perform several magic effects to the audience and they are to observe and take note of the details in order to solve the secret and the method of how to achieve the effects.

- **Mission: Think creatively! Think out of the box**

Team will think on their own then discuss the possible methods to achieve the observed effects that are performed, then try to recreate the effect completely on their own using their theories and observation.

- **Mission: You are the Magician!**

Team will take turn to perform the chosen or assigned effects using their own constructed process.

- **New mindset through experiential learning**

The effects will be taught the way the magician performed it and check against different concepts and levels of complexity in order to achieve the same perceived result by the spectator. By performing this in an entertaining way, participants will learn about thinking out of the box principles that can be applied to their work with a new mindset.

Solving Problems the Magical Way
